WORK EXPERIENCE

Senior Consultant Contract (Client SAP), Accenture

Client Location, Pune • July 2020 — Present

- Implemented Cache Tier for internal web tools on which DevOps and Database teams are highly dependent on. Earlier page load time was more than 3 mins, after cache implementation reduced it under 20 seconds.
- Upgraded **Terraform** (IaaS) tool from older version to latest version for Azure Cloud. Whole Cloudcore-api is heavily dependent on this which is MultiCloud infrastructure deployment solutions for converged cloud, openstack, azure, aws.
- Currently working on Dockerization of internal web tools
- Doing pipeline management is also a day to day task
- Also have taken the ownership of web tool which was handled by Database team for their daily tasks it's is written using Javascript and Flask framework (Python)
